

TRAINING

Adult learning theory states that lessons need to be applied and evaluated by adults for optimal learning. We integrate this theory into our training by incorporating individual exercises, role-play, teamwork, skill practice, coaching, and evaluations.

COURSE DESCRIPTION

- This one-day workshop enables participants to learn and understand the impact of emotions in the workplace. Participants will develop a greater awareness of emotional reactions and those of their direct reports. Also, participants will learn how to communicate with their direct reports in ways that help them to manage their emotions more effectively.
- Given the increased competitive pressures of a global market place and increased demands in customer requirements, sales professionals have found they must sell differently and to different decision makers than they did in the past. These new requirements can result in a wide range of feelings and frustration. This requires learning how to manage tension and increase personal (emotional) comfort in adapting to various challenging situations and challenges.
