

## TOGETHER IN TANDEM

Remember the thrill and excitement of receiving your first bike? Now, imagine being directly responsible for bringing that joy to disadvantaged children in your community! The *Together in Tandem* program is a hands-on, highly energizing program that brings your team together to build bicycles for a local children's charity. Monetary donations are obviously important to charitable organizations. But to be fully successful these groups also need the active involvement of the people in their communities. In the *Together in Tandem* workshop your team experiences a true sense of accomplishment while making a tangible contribution to the community they live and work in.

### GOALS OF THE PROGRAM

- To build a defined number of children's bikes through an experiential team event.
- To support the efforts of a local, community-based charity.
- To have fun while making a difference!

### HOW IT WORKS

The Training Edge will assist you in identifying a local charity (based on your office location) to partner with for this rewarding event. This local charity will be the beneficiary of the fruits of your team's labor. While this experience requires good teamwork, application of skills, and collaboration, these collective elements create assembled children's bikes to be donated to the designated charity. Whenever possible a representative of the charity will be present at the event to collect the final products.

Another important outcome is the team result of working together for a common vision and purpose.

**MAKE A DIFFERENCE FOR CHILDREN WHO ARE NOT AS FORTUNATE TO OWN THEIR OWN BIKE.**

This program is available for all group sizes. (Small to large)

This can be offered in a 2 or 4 hour session.
