

## TEDDY BEARS TO THE RESCUE

### HOW IT WORKS

The Teddy Bears to the Rescue Program is a fun and important way to provide comfort to children who experience a traumatic event, like a car accident, house fire or injury. More than 11 million children are transported to a medical facility each year. These stuffed animals are used by the emergency medical professionals and can help pacify a child during this frightening time.

Participants divide into small work teams. Each team has a series of puzzles to solve, codes to decipher, and secrets to unlock in order to acquire the resources that they need to build a build high-quality "Teddy Bear to the Rescue!" Teams choose accessories to add life and personality to their furry new creations. Even the bear assembly itself is served up as a highly engaging task. Each group also makes another accessory which will be personally signed by each team member.

Once the bears are completed, they are presented to your local charity of choice. Participants in this fun, challenging program exercise critical thinking and problem solving skills while taking part in a wonderfully philanthropic event. For everyone involved, the benefits are truly priceless.

### WHO SHOULD ATTEND

This program is available for all group sizes. (small to large)

### DURATION

This can be offered in a 2 or 4 hour session.

### PROGRAMS

There are several options for this program:
